FACULTY OF LAW

Degree Course in Legal Expert in Development and Internationalization of Enterprises

The Degree Course

The Faculty of Law has activated the Degree of Legal Expert in Development and Internationalization of Businesses corresponding to the Class 2 of the Degrees in Legal services sciences.

The Degree aims at ensuring a strong basic cultural and judicial preparation that allows students to master the methodology and the tools of legal reasoning. Meanwhile, the Degree aims at training professionals capable of operating in markets with a particular reference to the international rules drawing up a contract, to financial transactions, to the problems of communitarian and international contracts and the organization of international consultancy services.

By means of the videolessons of the most important professors and lecturers at international level, supplemented by multimedia training materials, exercises, virtual classrooms and other analysis, more-in-depth study and assessment tools, the students of the LAW Faculty are continuously supported by tutors, researchers and area professors along their path in a continuous and stimulating exchange based on interactivity.

Three-year Study Programme

I year

- Political economics
- Statistics
- Institutions of public law
- Institutions of private law
- Foreign language
- Contemporary history
- Elements of computer systems
- Philosophy of law
- Elective activities

II year

- Labour law
- Business law
- Administrative law
- International law
- Compared public law
- Compared private law
- Foreign language
- Elective activities

III year

- Civil procedural law
- Business economics
- Taxation law
- European Union law
- Criminal law
- Elective activities
- Other activities

How to study

The psycho-pedagogic and didactic model, born from the results achieved by several international research projects, was realised by Prof. M. A. Garito and by her research team.

This model is based on cognitive and connectionist theories and concretises the shift:

- From teacher's central role to the student's central role;
- From knowledge transfer to knowledge creation;
- From integration between practice and theory from a passive and competitive learning to active and collaborative learning.

The student is at the centre of the training path, guided by the new profile of the telematic professor-tutor who has the task of supplying the tools that can facilitate his web-based learning and communication path.

The whole teaching and learning process takes place on the Internet. On the www.uninettunouniversity.net portal there is a dedicated area: The Didactic Cyberspace, where teaching and learning are performed in four languages: Arabic, English, French and Italian. The Internet-based transfers directly to the student's desk lessons, multimedia products, databases, exercises, evaluation and self-evaluation systems, online tutoring, forums, chats and thematic wikis.

▪ Videoleasons:

The digitised videoleasons are the starting-point of the learning process. Each video lesson is structured on different issues and indexed in order to give the student the possibility to follow the entire videoleason or to select the issue he wished to study more in depth. Each issue is linked, in an hypertextual way, to essays, books, texts of exercises, virtual laboratories, selected bibliographies, lists of websites (links of interest for the subject, selected by professors and tutors).

▪ Virtual laboratory:

It is a environment in which the student integrates theory with practice by a "learning by doing" process.

▪ Online Exercises:

This section includes online interactive exercises linked to the issues treated in the videoleasons.

▪ Online tutoring/virtual classroom:

Online tutoring is organized in classes of 20 or 30 students, with an advanced system of Agenda that is able to acknowledge the single user and customise the training activity. An advanced system of qualitative and quantitative tracking makes it possible to continuously monitor the learning process of each single student.

The tutoring activities take place:

- In a synchronic mode by means of chats, video-chats, video and audio-conferencing systems, that are implemented in the Didactic Cyberspace, but also in the three-dimension classroom set up on UTIU Island of Knowledge on Second Life.
- In a diachronic way by means of forums, wikis and social networks.

The virtual classroom is an environment where direct interaction between teachers, tutors and students takes place, where knowledge is shared. The virtual classroom interactive practice exercises, mid-term assessment tests take place; dialogue and learning take place in a cooperative a collaborative way.

Vincenzo Zeno Zenconich delivers a lecture for the UTIU

How to enrol

Enrolments can be made only on the Internet, in the area devoted to the Administrative Secretariat of the portal www.uninettunouniversity.net. Payments can be made online by credit card or bank transfer or postal service.
