

## Law Faculty

# Three-year Degree Course in Business, Labor and New Technologies Law

## The Degree Course

---

The graduates in Business, Labor and New Technologies Law will carry on professional activities in the public and private juridical-administrative sector, in administrations, in businesses, in the not-for-profit sector and in international organizations for which a specific juridical training, supplemented by a high-level skill in problem-solving even in particularly advanced technological sectors that are still unregulated, is required.

To this end, the curricula of the degree course assure, thanks to special modules characterized by appropriate methodologies, the acquisition of suitable knowledge, especially as regards the new technologies, the digitization processes and all other juridical problems related to the fast development of technological sciences. The graduates in Business, Labor and New Technologies Law will also be able to carry on consultancy activities in the field of safety in the workplace including a specific more-in-depth study of issues related to this sector into the curricula.

By means of the videoleasons of the most important international scientists, supplemented by multimedia educational materials, exercises, virtual classrooms and other tools of analysis, more-in-depth study and assessment, along their study path, the students are constantly supported by tutors, researchers and area professors in a continuous and stimulating confrontation based on interactivity.
