

Master in Finance and Investment

(In cooperation with the **London School of Business and Finance**)

The MA in Finance and Investment programme is aimed at producing candidates to high-level professions as well as high-quality finance researchers. The course builds a solid foundation in the theory and practice of financial decision-making, therefore it is ideal for students aiming to pursue any career in finance or banking, an academic career and is an excellent base for any management position where finance is a part of the role. In the ever-changing field of finance and investment, understanding its key areas at a national and global level is critically important. The programme is aimed at analysing the financial markets and the financial systems of both developed and emerging economies. Developed alongside international organisations, this master course ensures graduates the main knowledge they will need in the labour market. The Master in Finance and Investment is aimed at students wishing to take their careers in the finance sector and at professionals working in banking sector and in other financial institutions, governments and businesses and who wish to develop their skills in the finance and investments sectors. The wide range of core modules (Financial Analysis, Quantitative Financing, Financial Markets and Corporate Finance) and the specialist ones will allow graduates to be able to act autonomously in planning and implementing global financial strategies. The Master's programme includes a number of specialist pathways, allowing students to tailor the programme structure according to their own career goals.
